

- what is JS : Popular pgm language, faster growing
- what u can do with JS : only useⁱⁿ web browsers
Cold days
now → web/android apps, real time
v/w apps
(video streaming)

where does JS code run → only in Browser
Cold days

JS Engine

Firefox; SpiderMonkey

Chrome; V8

Node

now
(OS)

u can open on any webpage with tool → inspect
on google chrome → Console

Inside console

> console.log('Hello world'); // enter

< ~~HI~~

> 2 + 2

< 4

> alert('yo') // shows pop msg over web page
